

## Other Accessories

# Fabric Flotation Table

**Ensures stable and continuous airflow across the entire table surface**

### FUNCTIONS

- Creates an air cushion to eliminate friction, allowing for the gentle and flexible movement of heavy fabric stacks.
- Equipped with a powerful 2.2kW air blower motor, providing high volume and stable airflow for the entire table surface.
- Smart modular design allows for easy assembly and length expansion according to the actual needs of the factory.
- Protects the structure of the bottom fabric layer, preventing shifting or deformation when transporting the spread to the cutting machine.

### SPECIFICATIONS

<b>Width</b>	1830mm / 2130mm / 2330mm
<b>Length</b>	Modular Design: 1200mm / section (Expandable length as needed)
<b>Height</b>	Flexible adjustment: 830mm ~ 870mm
<b>Tabletop Thickness</b>	25-30 mm
<b>Weight</b>	34 KG
<b>Power Supply</b>	380V, 3-Phase
